SPRING FOR YOUR HOME

Our new cups and mugs bring colour and freshness to everyday life and are truly unique. Each cup is shaped and painted by hand, creating small nuances that make it unique. Made from high-quality stoneware fired at high temperatures of 1150 to 1300 °C, the cups are particularly strong and less porous. This makes them resistant to stains and cracks, ensuring they will reliably accompany you through every day.

COLOURFUL FAVOURITE PIECES MADE FROM FUSED GLASS

Our new glasses and bowls made from painted fused glass bring colour and individuality to your home. During the manufacturing process, the raw material in the form of glass sheets is painted by hand, dried and then fused at 750 to 850 °C. The heat causes the material to settle over a ceramic mould, taking on its individual bowl shape. After slowly cooling down, the colours are permanently fused with the material and remain bright and durable.

The bold block stripes give these durable stoneware cups a stylish blend of modernity and timelessness. Thanks to the variety of colours and the bulbous shape, they are ideal for tea or coffee – perfect for cosy moments or social gatherings.

INDIVIDUAL ACCENTS

Our INDUSTRIAL series is growing: new butter dishes complement the existing collection. Each piece captivates with its two-tone reactive glaze, in which the colours react chemically with each other during the firing process, creating individual, never identical nuances – making each piece truly unique. Made from durable stoneware, a particularly dense and resistant material, all items are dishwasher-safe, microwave-safe and therefore ideal for everyday use.

The colours of the towels are perfectly matched to our CANDY tableware series – the fresh two-tone colours reflect their playful lightness and bring liveliness to your kitchen. At the same time, GOTS certification guarantees not only environmentally friendly cotton cultivation, but also fair working conditions.

SOFT, SUSTAINABLE, COLOURFUL

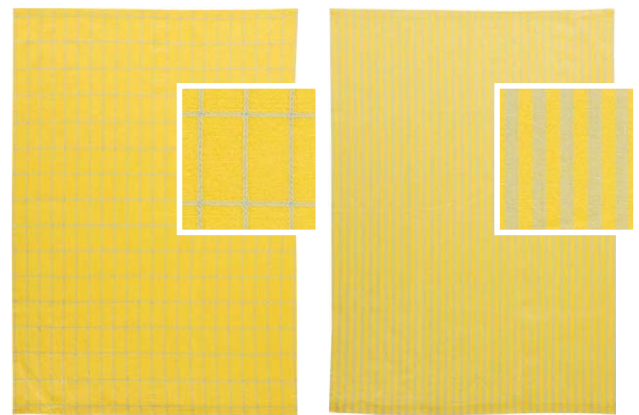

Our tea towels made from GOTS certified organic cotton combine functionality with sustainable design. The material absorbs moisture particularly well and releases it again at the same time, so that the cloths dry quickly and stay fresh. Over time, they become even softer without losing their durability, making them long-lasting companions in everyday kitchen use. Thanks to their versatility, the cloths are not only suitable for drying, but also as serving cloths or place mat.

FOR SMALL HANDS AND BIG APPETITES

Our lovingly designed children's tableware made of high-quality stoneware fits comfortably in small hands and reliably accompanies children through breakfast, lunch or happy children's birthday parties. Stoneware ceramics are denser and more resistant than conventional tableware, making them robust enough for every-day use – even if a plate falls down. Each piece is hand-painted and decorated with delicate colours, making the tableware not only practical but also a little favourite.

LITTLE ARTISTS, BIG FUN

Our aprons made from *GOTS* certified organic cotton reliably protect children from dirt and stains while painting, crafting, cooking and baking. This allows little ones to boldly and creatively realise their ideas and actively participate in practical activities. The spacious front pocket offers additional space for small utensils, so that everything important is always within reach. Matching our hand-painted VELOBLOOM children's tableware, the apron and tableware together ensure colourful, cheerful moments at the dining table and when cooking together.

PRESERVING TRADITION – SECURING THE BASICS OF LIFE!

Our handmade blue pottery soap dishes come from a very special manufacturer in Jaipur, India. The founder discovered her passion for traditional blue pottery – an artistic pottery technique that has been closely linked to the history of Jaipur since the early 19th century and had almost fallen into oblivion! During a visit to the rural regions around Jaipur, she recognised the potential of this ancient craft: not only could it be preserved, but it could also become the livelihood of many families.

With great commitment, patience and numerous quality improve-ments, the breakthrough finally came. Today, the project offers more than 150 potters from four villages a fair and stable livelihood. In total, the company has helped over 1,000 employees secure a livelihood, thus saving blue pottery from extinction!

CLEVER SOAP DISHES

Our soap holders offer a hygienic and practical storage solution for solid soaps.

The different versions made of wood and stoneware not only blend harmoniously into different interior styles, but also match our soap dishes and bathroom ranges perfectly. Installation is simple and requires no drilling, while an integrated magnet holds the soap securely and ensures optimum drying.

HYGIENIC AND DURABLE

Neem wood has been valued in India for centuries for its health properties. Thanks to the antibacterial properties of the wood, soap remains hygienic and clean on these soap dishes. The practical drainage holes in the bottom of the dish ensure that the soap dries quickly and thus lasts longer. To ensure that the dish remains in good condition for a long time, we recommend cleaning it occasionally under running water and rubbing it with olive oil after drying.
